

## WE ARE

Smart Integrated Solutions (SIS) is a regional leader in delivering innovative energy-saving solutions across Jordan, Oman, UAE, and Saudi Arabia.

We empower businesses, developers, and homeowners to achieve lasting operational savings, maximize energy efficiency, and meet global sustainability standards.

By combining cutting-edge technology with deep industry expertise, SIS helps organizations reduce energy consumption, improve operational efficiency, and promote environmental sustainability.

## WHAT DEFINES US

OUR MISSION, VISION, AND VALUES
More than words: conduct, action, and culture.

At Smart Integrated Solutions (SIS), our mission and vision guide our strategic direction, while our values shape our culture and everyday actions. Together, they influence how we operate, how we collaborate internally, and how we serve and support our clients and partners across the region.

Our Vision

To lead the Middle East in smart, sustainable energy solutions that empower industries to reduce costs and environmental impact.

Our Mission To provide intelligent, integrated energy solutions that are efficient, scalable, and tailored to our clients' needs – delivering measurable value through expert consultancy, cutting-edge technologies, and comprehensive support services.

## COREVALUES

### **Innovation**

Embracing cutting-edge technology and creative solutions to drive energy efficiency.

### Sustainability

Commitment to eco-friendly practices and long-term environmental stewardship in every project.

#### **Client Focus**

Putting customers first by tailoring solutions to client needs and delivering measurable results.

### **Integrity**

Maintaining transparency, trust, and professionalism in all dealings.

#### **Excellence**

Striving for the highest quality and performance in our products and services.

### OUR SOLUTIONS

SIS offers a comprehensive suite of smart energy solutions, combining advanced products and expert services to drive real savings and sustainability for our clients. Our integrated approach ensures each solution is tailored to reduce operational costs and support green building goals.

### Integrated Product Packages

Full packages of smart energy products designed for maximum operational efficiency

### **Green Building Consulting**

Advisory services assessing SIS solutions' impact

### **Energy Optimization Upgrades**

Retrofits and upgrades for new or existing buildings to continually improve energy performance

### PRODUCTS AND SERVICES

#### **High-Volume Low-Speed (HVLS) Fans**

Large and multi sized industrial ceiling fans that improve airflow and can reduce HVAC energy usage by up to 30%.

### **Insulation Coating Solutions**

Advanced thermal coating for buildings that improves insulation, lowering heating/cooling costs.

#### **Smart Meters & Sensors**

Intelligent power meters and motion sensor switches that provide data and automation to eliminate energy waste.

### PRODUCTS AND SERVICES

#### **Energy Audits & Consulting**

Evaluating energy consumption and identifying savings opportunities; includes reporting and ROI analysis.

#### **Maintenance & Monitoring**

Providing after-sales support, and performance monitoring to ensure continued efficiency.

#### **Energy Optimization Upgrades**

Implementing upgrades in existing facilities (equipment retrofits, system improvements) to further reduce energy usage over time.

# SPINE CHOOSESIS

At Smart Industrial Solutions (SIS), we don't just provide products —we become your strategic long-term partner in reducing energy consumption and operational costs.

Our end-to-end smart solutions are designed to deliver measurable impact, from pre-assessment to post implementation, ensuring you see and feel the difference in both performance and sustainability.

We care about the planet — and we know you do too. That's why we engineer every solution to support your green building goals, while also enhancing air quality and indoor comfort for your people.

With SIS, you're not just installing equipment — you're bringing your building to life in a smarter, cleaner, and more responsible way.
